

**Estimated time needed:** 30 minutes

## Software Used in this Lab

To complete this lab you will utilize a Db2 database service on IBM Cloud. If you did not already complete this lab task earlier in this module, you will not yet have access to Db2 on IBM Cloud, and you will need to follow this lab first:

- ## Database Used in this Lab

1

## EMPLOYEES

**JOB\_HISTORY**

## JOBS

## DEPARTMENTS

## LOCATIONS

LOCT_ID	DEP_ID_LOC
L0001	2
L0002	5
L0003	7

- Create tables using SQL scripts
- Load data into tables

## Exercise 1: Create tables using SQL scripts

- [HR Database Create Tables Script.sql](#)

2. Login to IBM Cloud and go to the [Resource List](#) where you can find the Db2 service instance that you created in a previous lab under **Services** section. Click on the Db2-xx service. Next, click on **Go to UI** button.

3. Click on **SQL** on the left corner and click the +icon

Select the **From File** option.

4. Locate the file **HR\_Database\_Create\_Tables\_Script.sql** that you downloaded to your computer earlier and open it.

5. Once the statements are in the SQL Editor tool , you can run the queries against the database by selecting the **Run All** button.

**Run SQL**

\* HR\_Databa... x

Run SQL interface showing SQL queries and results.

SQL Queries:

```

37
38 CREATE TABLE JOBS (
39     JOB_IDENT CHAR(9) NOT NULL,
40     JOB_TITLE VARCHAR(30) ,
41     MIN_SALARY DECIMAL(10,2),
42     MAX_SALARY DECIMAL(10,2),
43     PRIMARY KEY (JOB_IDENT)
44 );
45
46 CREATE TABLE DEPARTMENTS (
47     DEPT_ID_DEP CHAR(9) NOT NULL,
48     DEP_NAME VARCHAR(15) ,
49     MANAGER_ID CHAR(9),
50     LOC_ID CHAR(9),
51     PRIMARY KEY (DEPT_ID_DEP)
52 );
53
54 CREATE TABLE LOCATIONS (
55     LOCT_ID CHAR(9) NOT NULL,
56     DEP_ID_LOC CHAR(9) NOT NULL,
57     PRIMARY KEY (LOCT_ID,DEP_ID_LOC)
58 );
59

```

Results:

Result - F
✓
✓
✓
✓
✓
✓
✓

Run all ☒ Remember my selection

6. On the right side of the SQL editor window you will see a Result section. Clicking on a query in the Result section will show the execution details of the job like whether it ran successfully, or had any errors or warnings. Ensure your queries ran successfully and created all the tables.

- **Note:** You may see several errors before the successful creation of the tables. These errors relate to the dropping (removal) of any pre-existing version of these tables. You can ignore these errors.

**Run SQL**

\*HR\_Databa... x

SQL

Syntax assistant

Resu

```

1  -----
2  --DDL statement for table 'HR' database--
3  -----
4
5  -- Drop the tables in case they exist
6
7  DROP TABLE EMPLOYEES;
8  DROP TABLE JOB_HISTORY;
9  DROP TABLE JOBS;
10 DROP TABLE DEPARTMENTS;
11 DROP TABLE LOCATIONS;
12
13 -- Create the tables
14
15 CREATE TABLE EMPLOYEES (
16     EMP_ID CHAR(9) NOT NULL,
17     F_NAME VARCHAR(15) NOT NULL,
18     L_NAME VARCHAR(15) NOT NULL,
19     SSN CHAR(9),
20     B_DATE DATE,
21     SEX CHAR,
22     ADDRESS VARCHAR(30),
23     JOB_ID CHAR(9),
24     SALARY DECIMAL(10,2),
25     MANAGER_ID CHAR(9),
26     DEP_ID CHAR(9) NOT NULL,
27     PRIMARY KEY (EMP_ID)
28 );
29
30 CREATE TABLE JOB_HISTORY (
31     EMPL_ID CHAR(9) NOT NULL,
32     START_DATE DATE,

```

Run all

☒ Remember my selection

7. Now you can look at the tables you created. Click on the data icon and then click on Tables tab

Find schemas or tables

Schemas

Name	Type
MYG36304	User

8. Select the Schema corresponding to your Db2 userid. It typically starts with 3 letters (not SQL) followed by 5 numbers (but will be different from the **MYG36304** example below). Then on the right side of the screen you should see the 5 newly created tables listed RTMENTS, EMPLOYEES, JOBS, JOB\_HISTORY and LOCATIONS (plus any other tables you may have created in previous labs e.g. PETSALe, PETRESCUE, etc.).

Exercise 2: Load data into tables

In this exercise, you will learn how data can be loaded into Db2. You could manually insert each row into the table one by one, but that would take a long time. Instead, Db2 (and almost every other database) allows you to load data from .CSV files.

The steps below explain the process of loading data into the tables you created earlier in exercise 1.

1. Download the 5 .csv files below to your local computer:
- Departments.csv

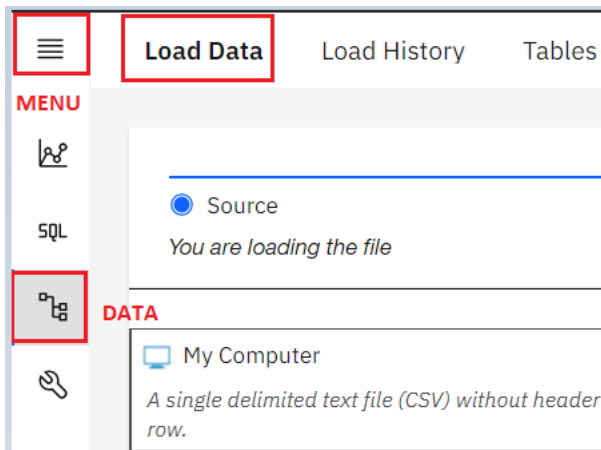

Employees.csv

- [Jobs.csv](#)
- [Locations.csv](#)
- [JobsHistory.csv](#)

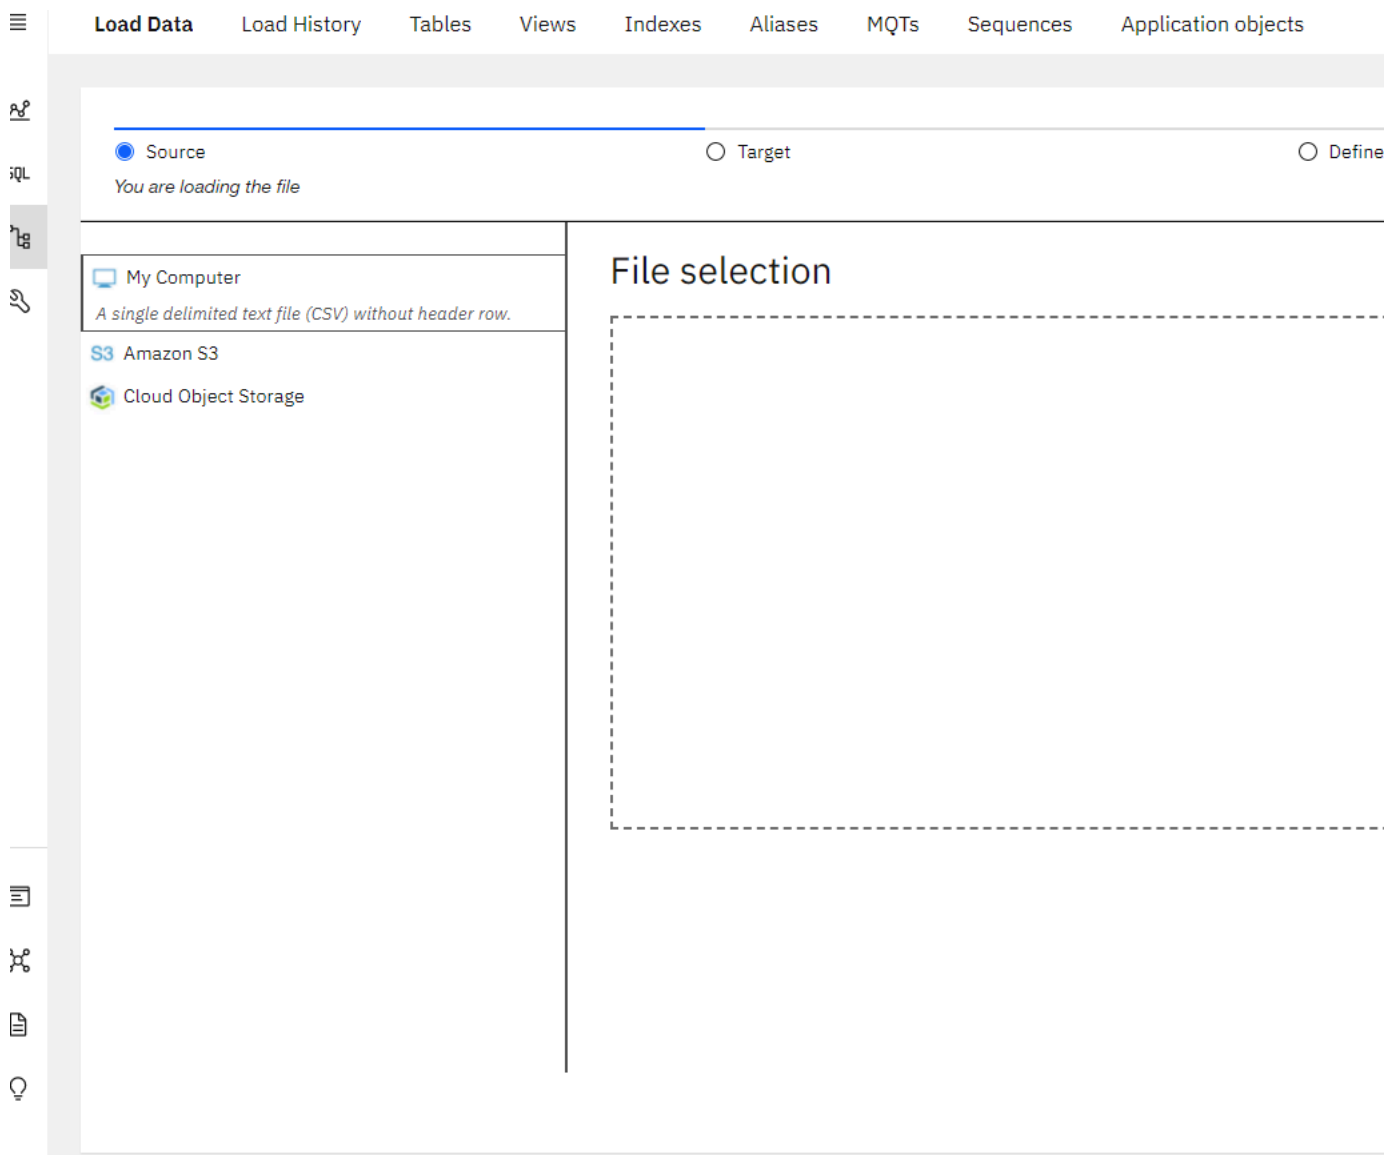

**Note:** For learners who are encountering issues with loading from .csv in Db2 using Firefox, they can download the .txt files and try with those. To download the .txt files, simply right-click on the file and select **Save link As** and save the file in local system.

- [Departments.txt](#)
- [Employees.txt](#)
- [Jobs.txt](#)
- [Locations.txt](#)
- [JobsHistory.txt](#)

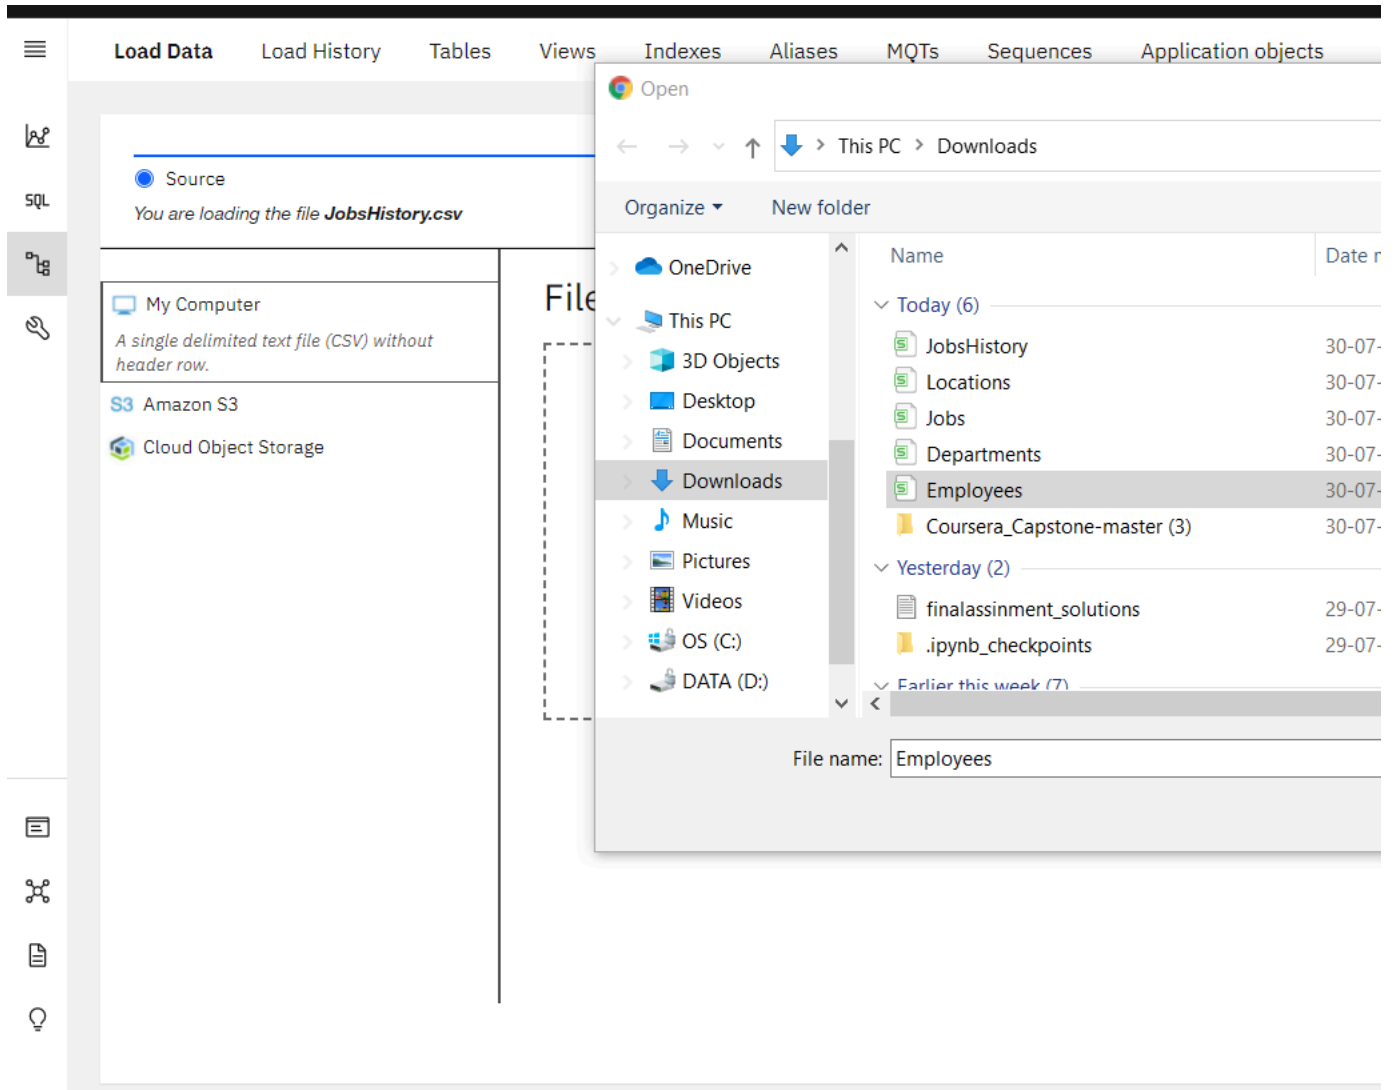

2. In the Db2 Console, from the 3-bar menu icon in the top left corner, click **Load**, and then select **Load Data**.

3. On the **Load Data** page that opens, ensure **My Computer** is selected as the source. Click on the **browse files** link.

4. Choose the file **Employees.csv** that you downloaded to your computer and click **Open**.

5. Once the File is selected, click **Next** in the bottom right corner.

## File selection

Drag a file here or [browse files](#)

6. Select the schema for your Db2 Userid (the one where you created the tables earlier). It will show all the tables that have been created in this schema previously, including the Employees table. Select the **EMPLOYEES** table, and in the new Table Definition tab that appears, choose **Overwrite table with new data** (note the warning message), then click **Next**. Select the **Employees** table.

The data load job succee

You can now work with your data.

10. Click on the **Tables** tab and then select the **EMPLOYEES** table and then click on **View data**.

The screenshot shows a database management tool interface. At the top, there are tabs for 'Load Data', 'Load History', 'Tables' (highlighted with a red box), 'Views', 'Indexes', 'Aliases', 'MQTs', 'Sequences', and 'Application objects'. Below the tabs is a search bar labeled 'Find schemas or tables'. On the left side, there is a sidebar with icons for 'SQL', 'Schemas', and other database objects. The main area displays a list of tables under the heading 'Tables'. The table 'EMPLOYEES' is selected, indicated by a checked checkbox and a red box around the row. The table 'DEPARTMENTS' is also visible. The status bar at the bottom shows 'Total: 5, selected: 1'. A red box highlights a blue button in the bottom right corner.

Name	Schema	Properties
<input type="checkbox"/> DEPARTMENTS	HYL83142	...
<input checked="" type="checkbox"/> EMPLOYEES	HYL83142	...
<input type="checkbox"/> JOBS	HYL83142	...
<input type="checkbox"/> JOB_HISTORY	HYL83142	...
<input type="checkbox"/> LOCATIONS	HYL83142	...

Total: 5, selected: 1

11. Now you can view the table data.

12. Now it's your turn to load data to the remaining 4 tables of the HR database **LOCATIONS**, **JOB\_HISTORY**, **JOBS**, and **DEPARTMENTS** from the remaining source files.
13. Click **Load More Data** and then follow the steps from **Step 3** above again to load the remaining 4 tables.  
**IMPORTANT** Make sure you perform the steps in **Step 7** for each of the 4 remaining file loads.

**Congratulations! You have completed this lab, and you are ready for the next topic.**
